ZENITH is the highest expression of technology among aquarium lightings, that joins together the concepts of innovation, performances, practicality and design in a single device, by exciting results.

This high quality level has been reached both on a work of optimization of the main lighting fluxes, and bringing the emitted power to surprising levels, thanks also to the use of new technologies and to the personalized study of new reflectors, both for the T5 and the HQI.

The researches and studies that have allowed the production of successful pendants, such as Infinity and Stealth, have been synthesized in this new pendant, characterised by an elegant shape and by a price extremely competitive.
